

Support the National Democratic Front of the Philippines

The National democratic Front of the Philippines (NDFP) has fought for popular democracy and economic justice and against U.S.-backed fascism and United Snake imperialism since its foundation in 1971. It sprang from the militant student and worker movement in Manila and quickly spread to all sectors in the Philippine society and across the archipelago. It now has a mass base of several million.

The NDFP is an alliance of revolutionary organizations led by the Communist Party of the Philippines (CPP). The CPP and the NDFP are leading a Protracted People's War against the U.S. Ramos regime. Through painstaking political work among the people, the NDFP builds areas of support in the countryside. It carries out land reform, builds new, popular organs of political power, and gathers forces to defeat the state's military.

The U.S.-backed ruling elite subjugates the Filipino people to the World Bank and the IMF (under)development policies, which secure high return on investments for American imperialists but leave the broad masses impoverished.

The Maoist Internationalist Movement and the Revolutionary Anti-Imperialist League work to build support for the people in the Philippines. We work against imperialism in order to stop the continuation of military and economic domination by the First World. To learn more about the revolution in the Philippines, to struggle with us or to help organize educational events contact us. Send \$1 for RAIL's pamphlet "Support the National democratic Front of the Philippines."
