

# TERRORIST PROFILE: Madeline Albright

The u.\$. State Department recently released its list of organizations it calls "terrorist". The state department says that 'terrorism' includes assassination, the use of biological and nuclear weapons and any form of physical force used against a civilian population in order to change a government policy.

Imperialists use this definition selectively to crack down on their political enemies and popular groups all over the world and to rally support for their wars amongst those that have a stake in the violent imperialist system that creates wealth for a handful of powerful countries while the majority of the people are impoverished and living in conditions of foreign occupation.

U.\$. imperialists say that Palestinians waging armed-struggle for self-determination against the u\$.-supported zionist regime of Israel are "terrorists" but they excuse people like Madeline Albright who engineered the u\$.-imposed sanctions on Iraq that have caused the death of more than 500,000 children. In 1996 she said "It's a hard choice, but I think, we, think, it's worth it."

At the very least, according to the State Department definition, Madeline Albright and the u\$. government should be tried on charges of terrorism against the people of Iraq.

Now the u\$. is waging a deadly war against the people of Afghanistan under the pretext of fighting 'terrorism' but the world's biggest terrorists and their supporters are here in Amerika. They are the u\$. government and people like Madeline Albright.

Imperialism has competition and war built into it and the type of terrorism that brought down the World Trade Center and punched a hole in the Pentagon is an inevitable consequence of the ongoing political and economic bullying that the u\$. and its allies carry out throughout the world.

The people suffering in the Third World are the victims of Amerikan terrorism and they can't count on pensions and Hollywood superstars to compensate them for the destruction of their countries, their homes and their families.

Studies for the Liberation of Aztlán and Latin America (SLALA) is opposed to the terror of sanctions, bombings and militarized borders and want terrorist regimes like the u\$. and people like George W. Bush and Madeline Albright to be held accountable for their actions against the people of the world.
