

Stop the genocide against Iraq!

Amerika has been waging a war against Iraq for years. The Gulf War was not over when u.s. troops stopped bombing Iraqi in 1991, or even after Operation Desert Fox in 1998. The on-going warfare waged through the economic blockade and continuing military threat has lead to the death and suffering of hundreds of thousands of Iraqi people.

Iraq is a country that not only used to feed itself, but had a health care system that was the among the best in the Middle East. Now hundreds of children die each day from preventable causes. Why? Because the U.\$. prevents the importation of medicine and basic health supplies.

That's a horrible reality, and for Secretary of State Madeleine Albright, it's a "price worth paying" when it comes to U.\$. foreign policy interests that revolve around access to oil.

To fully understand the current situation, it is necessary to discuss its origins. Criminal Murder in the Gulf is a video about Amerika's genocidal 1991 attack on the Iraqi people. Criminal Murder is useful for this purpose because it carefully explains how the targeting of civilian infrastructure such as electricity and sanitation was the

Amerikan agenda from the beginning of the armed war.

There will be a short presentation about sanctions after the video and then a discussion about the nature of Amerikan foreign policy in Iraq. Bring your questions about Iraq policy, and ideas on how we can get more people involved in the struggle against the imperialist genocide against Iraq.

These are but a few of the 500,000 to one million Iraqi victims of U.\$. imperialism.
