

>> Control units, or **security housing units (SHU)** as they are known in California, are special isolation cells within prisons. Prisoners are confined to these small cells for **23 to 24 hours a day**, for years at a time. Currently, in California, the standard SHU sentence is 6 years but it often continues indefinitely.

>> Control units are a **common tool of repression** used by the Department of Corrections and Amerikan injustice system. Control units **target prisoners who are actively fighting for their rights and isolate a disproportionate number of Black, Latino and First Nation prisoners.**

>> Control units vary from prison to prison but are **generally characterized by:** permanently designated cells in prisons that lock prisoners up in solitary or small group confinement for + 22 hours a day with no congregate dining, exercise or other services and virtually no programs for prisoners.

>> Prisoners are usually placed in control units as an administrative measure, with no clear rules governing the moves. This makes it **virtually impossible for prisoners to challenge their placement.**

In light of the torture occurring in imperialist prisons like Guantanamo Bay and Abu-Ghraib, it is even more vital that we expose the same conditions which occur in domestic U.\$. prisons everyday.
