THE SAVAGERY THAT U.\$ IMPERIALISM BRINGS TO THOSE IT OPPRESSES

Napalm is a thickened benzene product that is designed to cause maximum destruction and confusion. Besides being capable of burning straight through the bone, napalm is known to be a great psychological weapon against an already disadvantaged third world population. Because of this, it was a favorite weapon during the Vietnam excursion where it was dropped from undetectable B-52's on unsuspecting peasant populations.

White Phosphorus, another globally condemned incendiary chemical that has been used by the U.\$ oppressors in Iraq, has similar effects. Shot into the air, the glowing chemical falls down from the sky, burning people as it lands on them. One U.\$ General justified its use by saying, "A bullet goes through skin even faster than white phosphorus does."

Cluster bombs were developed during Vietnam. At the time they were called Pineapple Bombs and consisted of a canister that contained 250 metal pellets. As they canister blew, the pellets would spray in all direction. The U.\$ Military would drop a thousand of these over the area of a few football fields. The area would be blanketed with metal flying in all directions, killing or maiming anything in its path. After a short time, the small metal pellets were beginning to be replaced with small plastic shards. The reason for this being that plastic cannot be detected by an x-ray machine. Apparently, the initial carnage of such an offensive was not enough and the bloodthirsty U.\$ invaders sought to inflict prolonged damage to the third world populace.

Another modification to already deadly weapons was the addition of depleted uranium to bunker bombs and bullets. This updated version of death that Amerikkka brings to the world has found its use in the Iraq (1991 and 2003), the Balkans, and Afghanistan. Strong evidence suggests that, while depleted uranium laced bullets and bombs are already quite deadly, the United Snakes also added the much more radioactive non-depleted uranium [U-236] and even plutonium [PI-239], both byproducts of nuclear reactors and weapons programs alike. The savagery of the U.\$ war machine is unprecedented. Instead of supposed bourgeois democracy, the United Snakes has brought a radioactive hot zone over these nations. Now these places are contaminated, and will likely be so for the coming centuries. This is the peace that Amerikkka brings to the world: the sustained peace of radioactive-induced disease and mutation over many generations.

Today, millions of children around the world, whether they be from Vietnam, Cambodia, the Balkans, Afghanistan, Iraq or anywhere else that the U.\$ has set its heavy foot... millions of children from these places are born with fatal birth defects, many of them barely resembling human beings. This particular outcome of U.\$ foreign policy is fitting as U.\$ Imperialism has never throughout its history viewed or treated those it oppresses as actually human beings. This is evident in the weapons that the U.\$ develops and uses against relatively defenseless victims of its aggression and the lack of humane consideration that goes into the United Snakes' efforts to bring 'freedom' and 'democracy' to these people.

THIS IS THE DEMOCRACY THAT U.\$ IMPERIALISM HAS BROUGHT TO THE WORLD

So this is
WHAT FREEDOM
FEELS LIKE?!?
